

Roamly Groups V1 GTM Strategy

DRAFT V1 • FOR TEAM REVIEW
PREPARED BY VARUN PATEL, SENIOR PM

SEGMENT	MOTION	GOAL	NORTH STAR
Friend groups planning a trip together	PLG primary • CLG secondary	Acquire	Invite-to-signup rate

01 • POSITIONING

For friend groups planning a trip together, who today coordinate across separate accounts and manual payment splitting, Roamly Groups is a group-booking feature that lets one organizer plan, invite and split payment for the whole trip in one place. **Unlike manual workarounds — spreadsheets, Venmo, group chats — Roamly Groups turns Roamly's existing trust into a reason to book as a group, not just solo.**

02 • KEY MESSAGES

1 Plan it together, book it once One shared itinerary replaces separate bookings that never quite sync.	2 No more chasing friends for money Payment splits automatically, removing the organizer's social and financial risk.	3 Trusted hosts, now for your group The vetted-host quality solo travelers rely on, extended to group experiences.
---	---	--

03 • CHANNEL & METRIC

Recommended channel approach PLG-led: activation lives inside the product, an organizer starts a booking and invites the group via a	Success metric Invite → Signup
---	--

shareable link. CLG layers on top — travel-community shares and existing power users amplify reach. No paid acquisition needed for V1; the invite loop is the channel.

Leading indicator for the acquisition loop this motion is built on: the share of invited group members who create a Roamly account and join the booking.

04 • ASSUMPTION I'M PRESSURE-TESTING

CMO PUSHBACK • ORGANIZER TRUST RISK

Reviewers may assume the organizer takes on new social risk vouching for Roamly with friends. In practice the organizer already trusts their own group, and Roamly's vetted hosts and automatic split-payment reduce risk versus today's manual workaround, where the organizer personally fronts money and chases repayment. This is the wedge, not the blocker.
